Education

Wilfrid Laurier University   *Sept. 2016 - Exp. April 2022*

BSc in Computer Science

- Relevant course work: Software Engineering, Internet Computing, Object-Oriented Programming, Database I

Work Experience

Investigative Science Incorporated   *Summer 2016, 2017, 2018, 2019*

Lab Assistant   *Burlington, Ontario*

- Optimized and improved workflows for coworkers by automating Excel tasks and generating Certificate of Analysis with VBA
- Ensured optimal storage conditions by monitoring sample storage units and archiving the results daily
- Performed quality assurance over job file documents to ensure data integrity and maintained hundreds of safety data sheets for sensitive lab chemicals to meet health and safety standards
- Logged incoming samples and prepared them for chemical analysis, cleaned and prepared glassware

Projects

Portfolio Website   *June 2020*

- Designed and implemented a portfolio website to showcase my projects and skills
- Link: kumikorandle.github.io

Fitnessing Website   *April 2020*

- Designed and implemented a website which allows users to track and create workouts
- Developed the front end using HTML5, CSS, Javascript, Bootstrap and generated the backend with Django

Fitnessing iPhone App   *April 2020*

- Designed and implemented an iPhone application which allows users to track and create workouts
- Developed using Swift and designed user interface in Figma

Python Web Server   *Jan. 2020*

- Built a Python web server which allows clients to post and query notes on a public message board
- Implemented multi-threading so that the server can handle requests from multiple clients simultaneously

Flashcards Study App   *Sept. 2019 - Dec. 2019*

- Built an Android app which allows students to write digital flashcards and then review them for studying
- Designed key screens of the application, and created assets such as logos and icons. Implemented login screen and functionality

Laze   *Sept. 2018 - Dec. 2018*

- Worked with a large student team to build an application which provides a live and dynamic GPS map overview of Wilfrid Laurier University
- Undertook leadership role through organizing and managing the graphic design team and designed user interfaces using Figma
- Developed the front-end using HTML5, CSS, and JavaScript, and a Django backend which resulted in a high quality project and received the highest grade in the course

Real Estate Website   *May 2016 - June 2016*

- Worked as a freelancer to develop a website, design a logo and business card for a local real estate agent using Photoshop

Extracurricular Activity

Wilfrid Laurier Cheerleading Team   *May 2018 - Dec. 2018*

Flyer   *Waterloo, Ontario*

- Refined teamwork skills by collaborating with stunt groups to perform difficult stunts
- Developed excellent time management skills by balancing school with cheerleading practices and training sessions
